

Recent Development in Aquaculture

CIFAX- chemical formulation developed by ICAR-Central Institute of Freshwater Aquaculture, Bhubaneswar against Epizootic Ulcerative Syndrome in fishes (EUS)

CIFAX has been popularly used by fish farmers across the country with annual sales of 15,000 liters. It has gained popularity because of its preventive and control measures against Fish ulcerative diseases. Since last 21 years this product has been very successful in aquaculture in fish disease management. It has shown wide acceptability among common fish farmers of 17 aquaculture States. Due to its application, the microbial disease prevalence rate has been drastically reduced.
