

FMPIS Fortnightly Report

(16th – 31st May 2021)

Fish Market Price Information System (FMPIS) - Introduction

- Launched in the year 2019, the FMPIS project was initially implemented in 82 markets covering 05 States and 01 UT for collecting the fish price information till December 2020.
- Subsequently, 195 new markets were registered during January 2021 under FMPIS covering the states of Karnataka and all NE states, totalling to 277 markets on board.
- 254 enumerators were identified against the 277 markets and identification of enumerators for remaining markets is under progress.
- For the current fortnight, culled out data of 27 markets from 09 states was analysed.
- Among the new fish markets registered, Assam has been noted as an active participant in entering the fish price data followed by Tripura.
- Due to the COVID 19 Pandemic situation, many of the markets were closed and hence the data received for this fortnight is significantly at the lower side .
- Also, since there exists a BAN PERIOD (for the reporting period) for both East and West coast of India, the contribution of the marine fish species is relatively less .

No. of markets entered data

27

Statewise markets entered data

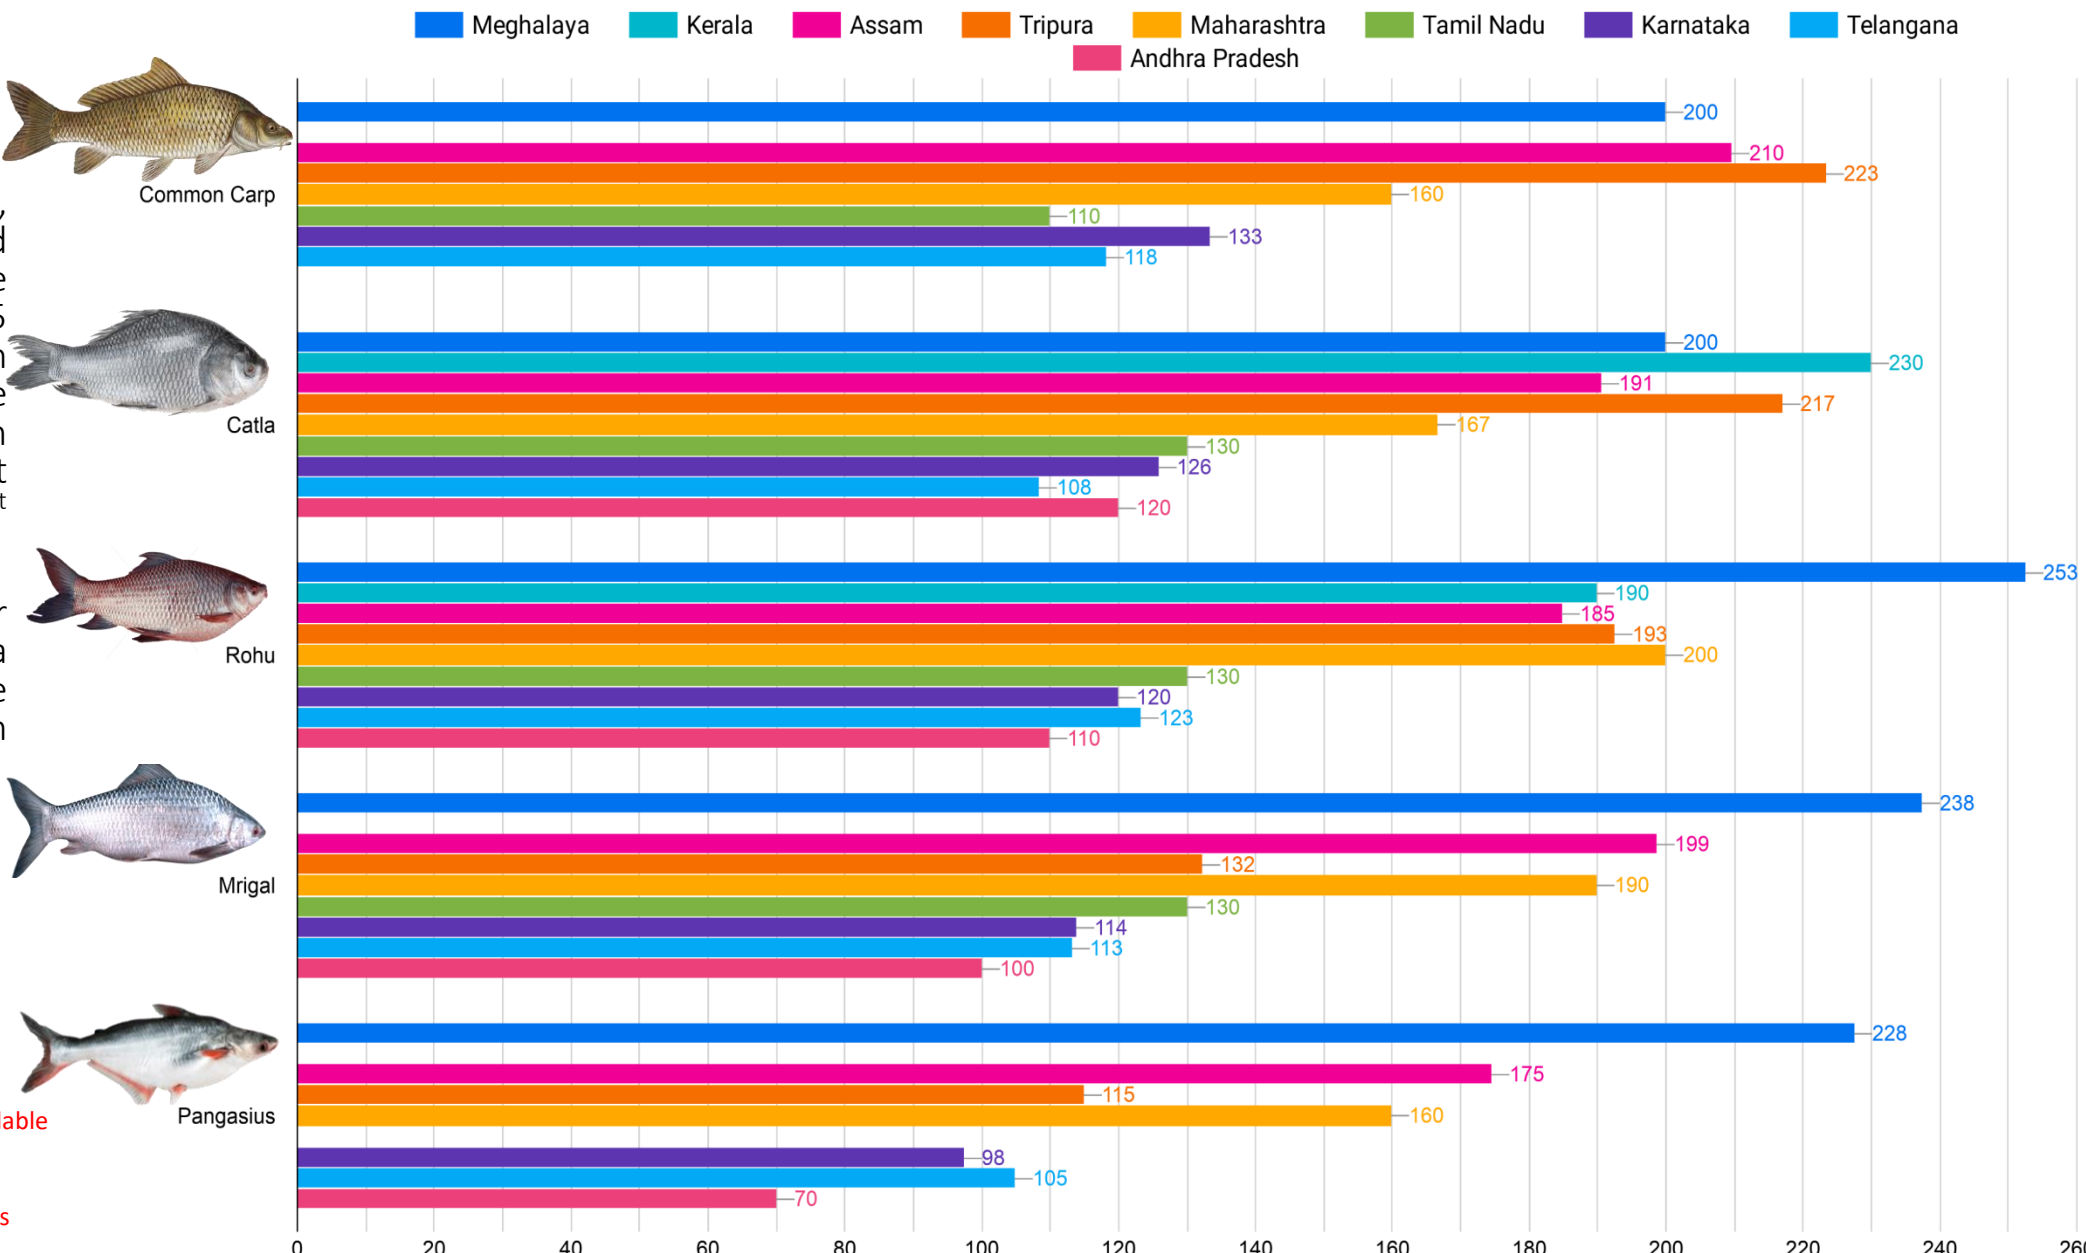

Fortnight: 16th - 31st May 2021

State/UT	No. of Markets
Assam	9
Tripura	5
Karnataka	4
Maharashtra	2
